Report Period: Aug 17-30

SD-May21-26

Summary of Progress in this Period

The team met with our Client/Advisor for the first time to learn more and understand our project in depth. The team then set up necessary tools such as Git repo, Trello, and Slack for the project. We started experimenting with the Kbase website and Selenium to gain some basic experience and skills with the tools we will be using for our project.

Pending Issues

- Get account set up for K-base to be able to mess around with it.
- Find time we can meet with Dr. Cohen consistently
- Understand scripting with Selenium.

Plans for Upcoming Reporting Period

- Individual assessments of Selenium testing framework.
- Another client meeting/presentation to learn more about the KBase tool that we will be testing.
- Begin thinking/brainstorming about architecture of software systems.
