Team Name: sdmay21-26
Team Members: Jake Veatch, Caleb Meyer, Sergey Gernega, Hunter Hall, Daulton Leach, Daniel Way
Report Period: Oct 12-Oct 18

Summary of Progress in this Period

- Continued work on the design document v2
- Resolution of bugs around selecting text fields in our GUI
- Implementation of random FBA parameter input

Pending Issues

- Integrating remaining primitive/basic variables (booleans, floats)
- Globus authentication flow hanging occasionally
- Analysis around queuing multiple jobs from the GUI
- Determination of next-steps for programmatic parameter generation

Plans for Upcoming Reporting Period

- Implementation of job/runner status display
- Finish implementation of primitive/basic inputs/variables
- Complete analysis around multiple parameter sets in the GUI
- Complete design document v2
